

## Underground or industrial boxes gel filled or insulating resin

NILED propose a wide range of gel pre-filled boxes for LV insulated conductors (allowing re-access to connexion) and thermo-bicomponents hardening resin) IPX8 – CEI EN 60259.

Some junction kits include connexion systems to facilitate installation. Some models also integrate some conductors-separators. You will find in the Niled range various connecting solutions to make junction or tapping branch.

## Insulated electrical lugs «compact space» with mechanical shear-head bolt(s)

Insulated bi-metallic lugs with easy installation :

- large range of cross-sections
- **Reduce volume after installation**
- Easy and quick installation thanks to mechanical shear-head bolts
- **Insulation of the barrel only rotating a plastic tube**

Reduce your stock, easy installation, only require the hexagonal standard tightening key.

## ISO 14001 process: **NILED** sets new objectives and targets for 2015

Through its manufacturing process, its human and technical organization , and more recently by integrating this notion in its Quality System , NILED is attentive for more than fifty years to the respect of its environment ( human respect , security & working conditions, raw material recycling ...)

In line with this approach, NILED reviews its organization **to satisfy within the end of 2015 the requirements of ISO 14001 certification..**
